João Gabriel Duarte de Castro

Full Stack Developer | Node.js · React · SQL · AI Automation
São José dos Campos, SP, Brazil · Remote (UTC−3) · decastrodeveloper@gmail.com
linkedin.com/in/joaoduarte010 · github.com/joao7duarte · portfoliojgdc.vercel.app

SUMMARY

Full stack developer building an internal program management platform at Embraer (JavaScript, Node.js, React, Oracle SQL) and AI automation projects through my own business, decastro.dev (n8n, LLM agents, MCP, Supabase). Turns business requirements into working software; Business Administration studies and 2+ years of English teaching make stakeholder communication a strength. Open to fully remote roles as an employee or contractor.

EXPERIENCE

Software Engineering Intern (Full Stack Development) | Embraer | São José dos Campos, Brazil | Jan 2026 – Present
Digital Initiatives, Programs Department – Commercial Aviation

- Develop and maintain features for EPMS (Embraer Program Management System), the internal program and portfolio management platform (JavaScript, Node.js, React, Oracle SQL, GitHub Copilot).
- Building an integration with Microsoft Graph API and Azure that syncs Microsoft 365 data into the EPMS database, replacing a 1-hour daily manual update; expected to save about 5 hours per week.
- Gather requirements from program stakeholders and translate them into features and data models in an Agile (Scrum) team.
- Write Python automation with Selenium and Playwright; build Oracle queries, tables and data transformations.
- Support portfolio management of aeronautics projects, aligning people and clarifying requirements.

AI Automation & Full Stack Developer | decastro.dev (self-employed) | Remote | Nov 2026 – Present

- Build AI agent and workflow automation solutions with n8n, LLM agent orchestration and Model Context Protocol (MCP), self-hosted on a Linux VPS.
- 3D product configurator for a client: three.js (WebGL) web app where customers design a custom racket in real-time 3D.
- Implemented the Supabase backend (PostgreSQL, Row Level Security, authentication) and TypeScript Edge Functions for order creation and Wix checkout integration with verified payment notifications.
- Wrote a Python image-processing pipeline that turns product photos into 3D textures and geometry; covered the app with 70+ automated browser tests (Puppeteer).

English Teacher (ESL) | Upwork (remote, students in China) | Dec 2024 – Jan 2026

English Teacher (ESL) | KidsGarden English School | São José dos Campos | Nov 2023 – Apr 2025

PROJECTS

AI Job Matcher | github.com/joao7duarte/ai-job-matcher | Node.js · n8n · Claude API

- Node.js service that collects postings from 9 sources (job-board APIs and company career pages), filters them and ranks each against my profile with the Claude API (structured outputs); n8n workflows send a daily shortlist to Telegram.

EDUCATION

Technologist Degree in Systems Analysis and Development | Universidade Anhembi Morumbi | Expected Dec 2027

Bachelor of Business Administration | Universidade Anhembi Morumbi | Expected Dec 2027

SKILLS

Languages: JavaScript, TypeScript, SQL, Python, HTML, CSS
Front end: React, three.js, WebGL
Back end & data: Node.js, REST APIs, Oracle SQL, PostgreSQL, Supabase
Cloud & integrations: Microsoft Graph API, Azure
AI & automation: LLM agents, Model Context Protocol (MCP), n8n, GitHub Copilot, Claude Code
Testing & tools: Selenium, Playwright, Puppeteer, Git, GitHub, Linux, Agile (Scrum), requirements gathering
